## TOPIC

Some cities create new housing for their growing populations by constructing many high-rise buildings. Other cities create more of low-rise buildings. Which solution is better, in your opinion?

# Introduction

With increasing population, urban samples might have changed. So, lots of cities have been developed by high rise building, other group of cities by low rise buildings. There will be some outcomes in high rise and low rise developments.

# Introduction

- With increasing population, urban **patterns should change. Therefore,** lots of cities have --- developed by high-rise building **constructions and another group of cities construct low-rise buildings.** There **would** be some outcomes in
- high- rise and low-rise developments.

There could be closer relations between people in high rise building cities. Because in complexes, neighbors are closer, physically. Whilst, in low rise cities, because of high distance, it might be not easy to have relationship with neighbors and friends. On the other side, it could be more safety in low rise building cities. If unexpected events like earthquake and thunderstorm happen in city, there could be less financial, vital damages. However, in high rise building cities, because of high density, more people may be at risk.

In one side, people will have closer relations in high-rise buildings and neighbors are physically close, while in low-rise cities, it might **not be** easy **because of long distances**.

On the other side, low-rise buildings **are more safe**. If unexpected **disasters** like earthquake and thunderstorm happen in **a** city, there **will** be less financial **and** vital damages. However, in high-rise building cities, because of high density, more people may be at risk.

In a tower, if person lives in high floors, with breaking down the elevators, they are not able to access their apartments. Despite high distance between person and his/her house, it is not impossible. In contrast, facilities are available in high ... But Situation is different in low ... , and accessibility to city center and shopping centers are not easy.

To bring another reason, people who live in a multi-story building, would not be able to access their apartments, when elevators are damaged but low-rise buildings do not have this problem.

- Generally, urbanization should be managed and limitations might be performed in both high and low rise building cities to city management can control all urban issues.

- Generally, **it is better to** manage and limit both high-**rise** and low-rise building cities. **In this way,** **population growth could be controlled.**

Some people think that technology plays a positive role in the home. Others, however, don't agree with this theory.

- In positive side technology helps to the parents to grow their children. In addition technology makes children more familiar with other culture and technology makes our life easier.

- In positive side, technology helps --- parents to **nurture** their children. In addition, **it** makes children more familiar with other cultures**s** and --- makes life easier.

- In negative side use of technology and media keep family member a way from each other. Moreover children can do anything without the knowledge of their families. Furthermore excessive use of technology and media also cause disease such as Autism and families have been suffering from this disease for years.

- In negative side, use of technology and media keeps(splits) family members (a way) from each other. Moreover, children can do everything without their families awareness. Furthermore, excessive use of technology and media also causes disease such as Autism and families have to suffer from this disease for ages.

- As a result in one hand technology has many advantages in our life, in the other hand can also have irreparable disadvantages.

- As a result, technology has **both** advantages in our life and irreparable disadvantages.
